### **Note:**

Overall, these changes will provide the best educational opportunities in the most cost effective, least impactful manner for children keeping neighborhood integrity, building capacity, class size, and transportation considerations as main drivers. These changes also allow for additional growth at Lower Nazareth and Butz Elementary Schools. This option has fewer students impacted by attendance zone adjustments compared to other options considered. There is minimal impact on transportation with these changes. If you have questions regarding what school your child will be attending, please call our Transportation Office at (610) 759-1170, ex.1177)
